TECHNICAL SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Redux Toolkit, Context API, React Hooks, HTML5, CSS3, Tailwind CSS, Material-UI, Bootstrap

Backend: Node.js, Express.js

Database: MongoDB

Tools & Technologies: Git, Postman, Jest, AWS (EC2, S3)

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2025 – Dec 2025

ArgosMob

Remote

- Built responsive user interfaces using **React.js** and **Tailwind CSS**, ensuring seamless backend integration with **Node.js** and optimal user experience across devices.
- Developed **Next.js** server-side rendering (SSR) and client-side rendering solutions for MediConnect healthcare platform, enhancing SEO through metadata optimization, dynamic routing, and server components.
- Collaborated with cross-functional teams to deliver healthcare and industrial applications with high code quality standards.

Software Engineer

Sep 2024 – Jun 2025

Deqode

Indore

- Developed responsive, mobile-friendly web applications using HTML5, CSS3, JavaScript, and Tailwind CSS with cross-browser compatibility.
- Built dynamic user interfaces with React.js, implementing state management using Redux Toolkit, Context API, and React Hooks.
- Collaborated in Agile environment with sprint planning, code reviews, and client calls to deliver solutions aligned with business requirements.
- Implemented TypeScript for type-safe code and translated Figma designs into pixel-perfect, accessible UIs.

Frontend Developer

Sep 2023 – Nov 2023

CodeBetter

Indore

- Developed user-facing features using modern JavaScript frameworks and collaborated with design and backend teams to implement responsive layouts and integrate APIs.

KEY PROJECTS

BeingPetz: Developed and maintained the frontend for a social platform for pet owners using **React.js** and **Node.js**.

- Built reusable components and implemented a fully responsive, mobile-first UI.
- Managed application state and implemented APIs using **Node.js** to ensure smooth, scalable functionality.
- Enabled pet owners to schedule vaccinations and view lost & found pets.
- Facilitated connections between pet owners and allowed the creation of community groups to enhance engagement.

EMC-Survey App: Built a production-grade, fully responsive survey application using **React.js** and **TypeScript**.

- Optimized the application for mobile and tablet devices, ensuring a seamless user experience.
- Integrated real-time data collection APIs for dynamic survey submissions.
- Implemented form validation, loading states, and UX feedback mechanisms to enhance usability.

EDUCATION

Master of Computer Applications (MCA)

Jul 2022 – Jul 2024

Sage University, Indore

Computer Application

Bachelor of Computer Science (B.Sc.)

Apr 2019 – Apr 2022

Govt. JNS College, Shujalpur

Computer Science
